WHOOSSHH

...RUDE

FIRST STEP IN REBUILDING IS FINDING A SOLUTION FOR HIS MISSING ARM.

THIS OLD ROBOTIC ARM SHOULD DO THE TRICK...

...FOR NOW.

STEP TWO: REBUILD THE MACHINE... AND MAKE HIMSELF A BETTER ARM.

ONCE THE MACHINE IS READY, HE NEEDS THE PERFECT MATERIAL.

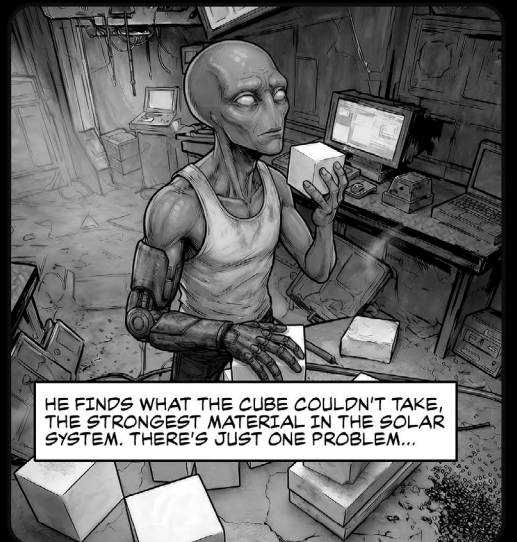

THIS IS NOT GONNA BE EASY

HAVING NO SUCCESS WITH NORMAL MILLING TOOLS...INSPIRATION STRIKES...

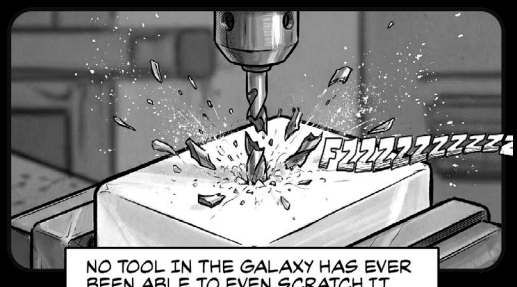

DIAMONDS, LAID BARE IN THE WRECKAGE OF MY WORKSHOP.

SHARP ENOUGH. STRONG ENOUGH.

I WONDER...

HE FINDS WHAT THE CUBE COULDN'T TAKE, THE STRONGEST MATERIAL IN THE SOLAR SYSTEM. THERE'S JUST ONE PROBLEM...

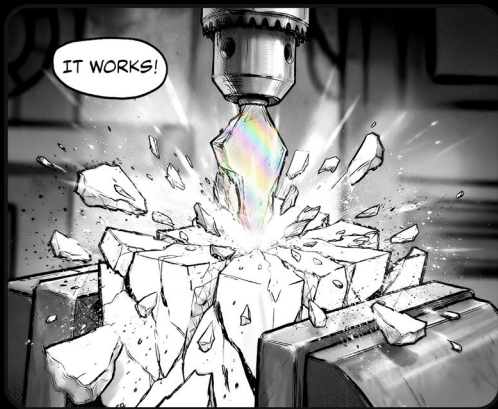

NO TOOL IN THE GALAXY HAS EVER BEEN ABLE TO EVEN SCRATCH IT.

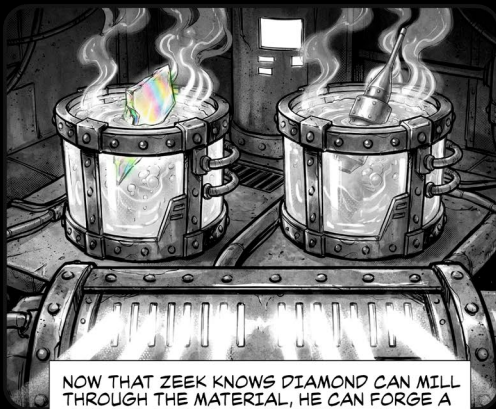

...NO!

ZEEK DECIDES TO GIVE THOSE DIAMOND SHARDS A CHANCE.

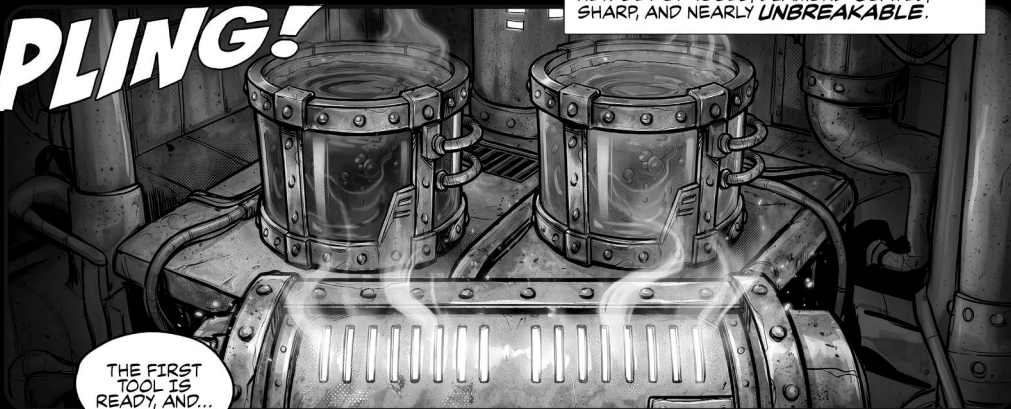

IT WORKS!

NOW THAT ZEEK KNOWS DIAMOND CAN MILL THROUGH THE MATERIAL, HE CAN FORGE A NEW SET OF TOOLS, DIAMOND-COATED, SHARP, AND NEARLY *UNBREAKABLE*.

**PLING!**

THE FIRST TOOL IS READY, AND...

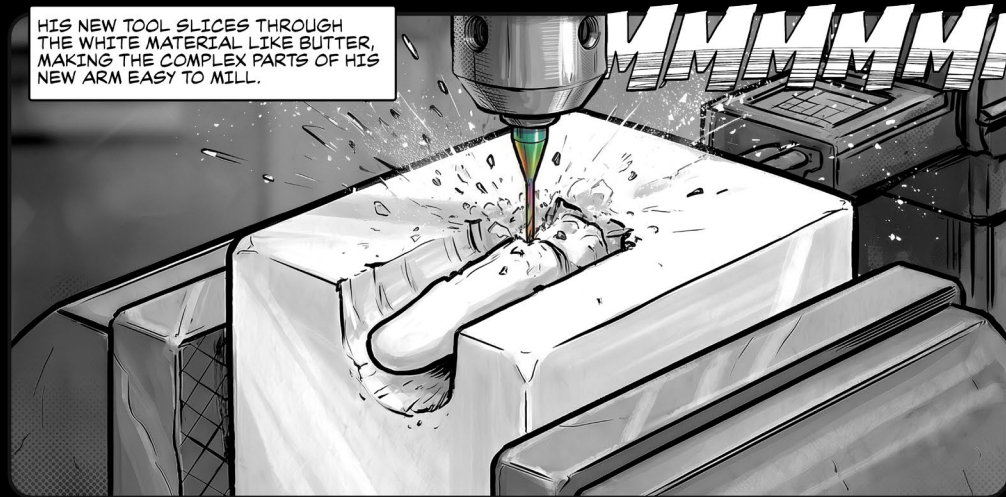

...ITS PERFECT!

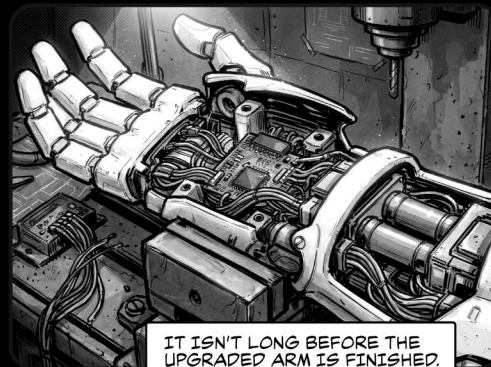

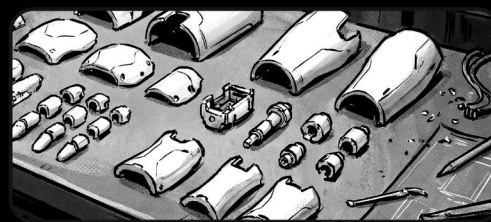

...THE FIRST *ALIENTOOL* IS BORN.

TIME TO WORK

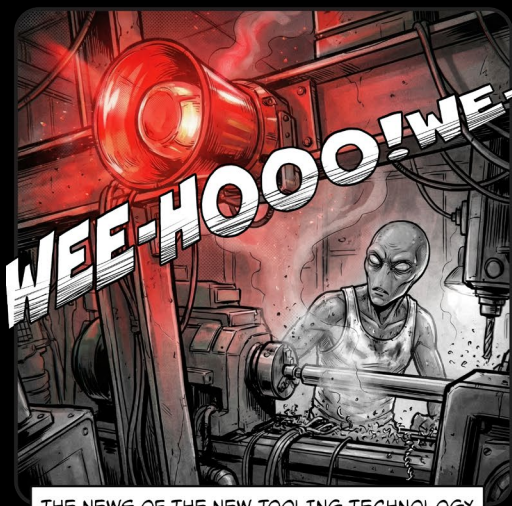

HIS NEW TOOL SLICES THROUGH THE WHITE MATERIAL LIKE BUTTER, MAKING THE COMPLEX PARTS OF HIS NEW ARM EASY TO MILL.

IT ISN'T LONG BEFORE THE UPGRADED ARM IS FINISHED. ZEEK HAS NEVER SEEN SUCH CLEAN, EXACT CUTS.

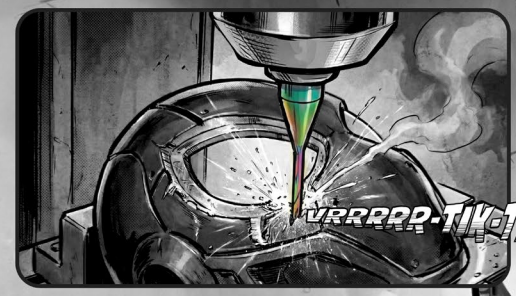

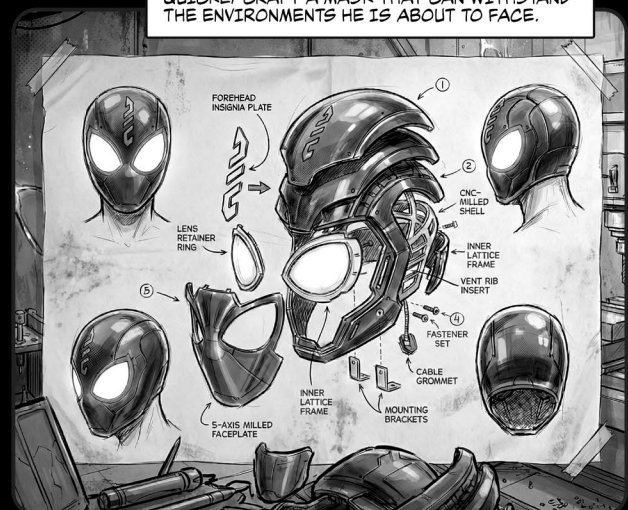

TRULY AMAZING...

THE NEWS OF THE NEW TOOLING TECHNOLOGY LEAK. HE REALIZES HE ISN'T SAFE IN HIS OWN SHOP ANYMORE.

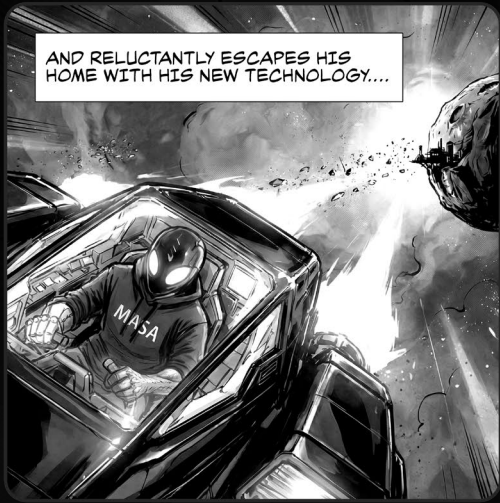

HE HAS AN ESCAPE VEHICLE, BUT HE NEEDS TO QUICKLY CRAFT A MASK THAT CAN WITHSTAND THE ENVIRONMENTS HE IS ABOUT TO FACE.

ZEEK TAKES ONLY WHAT MATTERS MOST

AND RELUCTANTLY ESCAPES HIS HOME WITH HIS NEW TECHNOLOGY...

AND FINDS A NEW HOME IN HIS ADVENTURE TO SPREAD THE **#MILLMOREUNTS MESSAGING** THROUGHOUT THE UNIVERSE...

TO BE CONTINUED...

## THE REAL ORIGIN STORY

Every legend has a kernel of truth.

Ours starts in Königsbach-Stein, Germany — not on a distant planet, but in a place just as obsessed with precision. For over 60 years, ZECHA Hartmetall-Werkzeugfabrikation has been engineering cutting tools so precise they're measured in microns. Carbide end mills. Diamond-coated burs. Tools built to shape the hardest materials on Earth — from hardened steel in mold & die shops to zirconia in dental labs.

Then came AlienTools.

Born from ZECHA's decades of manufacturing mastery, AlienTools arrived with a mission: bring world-class German cutting tools to the universe — starting with planet Earth. Same engineering. Same factory. A whole new attitude.

Where ZECHA earned its reputation through quiet, relentless precision, AlienTools turned heads. Colorful coatings. Series named Invader, Sentinel...

Tools that don't just perform — they announce themselves.

Today, AlienTools supplies dental milling centers and industrial machining operations across the globe, backed by every micron of ZECHA's six decades of know-how. Two brands. One factory. Zero compromise.

The tools are real. The precision is real.  
The aliens... well, you just read the comic.
